Mr. Thelmo Cameron
Southern Missouri Containers, Inc.
Box 4306 G.S.S.
Springfield, MO 65804

Dear Mr. Cameron:

This letter is to inform you of the upcoming Public Hearing on Monday, May 23, 1983, at 7:00 P.M. in the Council Chambers of City Hall. The City of Springfield is conducting the hearing to inform anyone who discharges or introduces non-domestic pollutants into a Publicly Owned Treatment Works (POTW) of the proposed Pretreatment Program and revised Wastewater Use Ordinance scheduled to take effect July 1, 1983.

The Federal Regulations in 40 CFR 403 require POTW's with design flow in excess of 5.0 million gallons a day or which receive industrial waste sources subject to the National Pretreatment Standards to establish Pretreatment Programs by July 1, 1983.

Since your company does discharge to the City sanitary sewer system, which is a Publicly Owned Treatment Works, it may be advisable for a representative of your company to attend.

Please find the enclosed copy of the revised Wastewater Use Ordinance which includes the proposed Pretreatment Program. We would appreciate it if you would review this document thoroughly. As you review the Ordinance, you will notice that Section 30.26 "Specific Pollutant Limitations" is left blank. The reason is that we are still in the development stage for these limits. We should have these limits established and available within six (6) months.

If you have any comments on the Wastewater Use Ordinance, they can be made at the hearing or by mail. Comments made by mail should be sent to:

Mr. Robert R. Schaefer
City Hall, Room 210
830 Boonville
Springfield, Missouri 65802

2126 E. DALE

All written comments should be received by May 23, 1983.

If you would like to review the complete Program Document and how it will be administered, copies will be available at the Springfield-Greene County Public Library, 397 East Central (Main Library), 2214 Brentwood (Brentwood Library), and the City Clerk's office, 2nd floor of City Hall.

If you have any questions, please feel free to call.

Yours truly,

Gene Pabst
Water Pollution Control Inspector III

Southern Missouri Container, Inc.
2126 East Dale Street
Springfield, Missouri 65803

Dear Sirs:

Recent routine surveillance of the storm drainage ditches to the south and west of your property indicates that a discharge is leaving your property. This discharge appears to contain a paint-like material and there is considerable pooling of the material on your property. Please be advised that this discharge is a violation of City, State, and Federal Laws. Similarly, the placement of contaminants on your property where they can be carried away by subsequent stormwater is a violation of the law.

We would request that you contact this office within one (1) week and inform us of a convenient time when we could meet with your representatives to discuss water quality problems and determine their source. If we may be of any assistance, or can answer any questions, please do not hesitate to call.

Yours truly,

Charles H. Criswell
Chemist and Aquatic Biologist
Industrial Waste Surveillance & Enforcement

THE Building at 2126 E. DALE, formerly occupied by Southern Mo. Containers, is now being occupied by L.C. Cook & Co. The use, WHETHER STORAGE OR MANUFACTURING, is UNKNOWN AT THIS TIME. Continued SURVEILLANCE OF THE SEPTIC TANK PROBLEM WOULD PROBABLY BE IN ORDER.
